

I'm proud to announce that there is a **Chat** available on my page now! Registered users are able to join the chat.

The chat is available through the main menu.

On the bottom of the right side you can see who is online in the chat.

The chat will open a new window / tab so that you are still able to look at my page while chatting.

In the chat window there are several chat *commands* available. To get a list of these commands type **/help** in the input field.

When you enter the chat, there are initially 3 rooms: *Deutsch* (German), *English* and *OffDuty*.

I hope to see you there soon!

Volkmar
