

[Thunderbird](#)

You are looking for a good and free Email Client? Well, here is Thunderbird! Compared to Outlook Express it is great to have Thunderbird.

Thunderbird is easy to install and configure. There are lots of documentations how to set up Thunderbird using a special Email Provider. And you can also have a look at one of the Forums to get help and hints with Thunderbird.

Just as for Firefox there are many free Addons available to customize Thunderbird. Just have a look at the Addon list on the developer homepage.
